Positive Reinforcement Idea for Nursery to KS2

Contributed by Jane Cross

I find having a soft toy or even two or three who will "sit with someone working quietly/appropriately/listening well" whatever the focus of the lesson, works well with any age junior child. It is a great way of not having to repeat yourself if the class become noisy etc as you can just say "(toys' name) is looking to sit with someone who....." This worked particularly well as a supply teacher when you often don't know names. Great for positive reinforcement.

All resources in the "Contributions" section of our resource bank have been submitted by delegates on our Taking Care of Behaviour Online course. For more information about this practical, self-paced course, please visit: <http://www.pivotaleducation.com/taking-care-of-behaviour-online/>
